EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

2. Authorization for this examiner's amendment was given in a telephone interview with Roger Fulghum (Reg. No. 39,678) on February 26, 2008.

3. The application has been amended as follows:

1. **(Currently Amended)** A method for identifying host information at a physical layer of an information handling system, the information handling system including a host computer, the method comprising the steps of:

issuing a command from a host computer, the command being issued in a first transport protocol; and

sending a host information command to a device, the host information command including a host identifier identifying the host that issued the command and a tag identifying a reissued command, the reissued command including the command reissued in a second transport protocol, wherein the device does not support command queuing, further comprising the steps of:

receiving a response from the device, the response being sent following a receipt of the host information command by the device; and
reissuing the command to the device, the command being reissued in the second transport protocol.

3. (Currently Cancelled)

7. (Currently Amended) The method of ~~claim 3~~claim 1, wherein the appliance receives a response from the device and reissues the command to the device.

19. (Currently Amended) An information handling system for identifying host information at a physical layer of an information handling system, the information handling system comprising:

a host computer, the host computer issuing a command in a first transport protocol;

a device; and

an appliance, the appliance sending a host information command to the device, the host information command including a host identifier identifying the host that issued the command and a tag identifying a reissued command, the reissue command including the command reissued in a second transfer protocol, wherein the device does not support command queuing, and wherein the appliance receives a response from the device, the response being sent following a receipt of the host information command by
